Project Development Phase

Dashboard & Data Testing

Team ID:	LTVIP2026TMIDS70988
Project Name:	Calculating Family Expenses Using ServiceNow
Maximum Marks:	

Model Performance Testing

S.No	Parameter	Screenshot / Values
1	Data Rendered	Expense data successfully displayed in tables and reports. Add screenshot showing expense records and summaries.
2	Data Preprocessing	Expense records validated before storage. Mandatory fields and correct formats applied. Add screenshot of validated expense form.
3	Utilization of Data Filters	Reports allow filtering by date or expense category for analysis. Add screenshot of filtered expense report.
4	Queries / Business Logic Used	Business rules automatically calculate totals and update summaries. Add screenshot showing updated totals after entry.
5	Dashboard Design	No. of Visualizations/Graphs: 4–6 charts showing expense trends and summaries. Add dashboard screenshot.
6	Report Design	No. of Visualizations/Graphs: Expense tables and summary reports generated successfully. Add report screenshot.
